

Would you like to join a Community Advisory Committee for the Trout Creek Wind Project?

Schneider Power is interested in forming a Community Advisory Committee (CAC) made up of individuals who live, work or play in Trout Creek and the surrounding area. We hope that a Community Advisory Committee will:

- ❖ *Bring forward community views on renewable energy development and wind power*
- ❖ *Help to extend our communications network*
- ❖ *Provide advice and feedback on our development plans and efforts to engage the community in the decision making process*

If interest in a CAC warrants a committee, we envision several meetings of the group being held in Trout Creek at times most convenient for the members, with the focus of the first meeting being to further determine the role and format of the group. We also expect that some discussion would occur by e-mail as well.

If you are interested in participating in a CAC please let us know by either indicating so on the Contact Information Return Form, or contacting us directly using the contact information below.

Community participation is important to Schneider Power and we would like the opportunity to speak with you. Please contact us if you are interested in arranging presentations to your community organization.
